ERICK OWEN INDRI KALUMATA

Manado, Indonesia
owenkalumata46@gmail.com | +62-852-5661-4628 | https://linkedin.com/in/owen-kalumata

I am a highly motivated Information Systems graduate with a passion for creating digital solutions that deliver real impact. My expertise focuses on developing modern web and mobile applications using Laravel, React, and Python, with a particular interest in implementing technologies that support sustainability. Furthermore, I have experience working on machine learning-based projects, particularly in the application of artificial intelligence for data analysis and pattern recognition. I enjoy working directly in the field and in dynamic environments, am accustomed to solving problems through code, and am committed to continuously growing within a team that values innovation, efficiency, and purpose-driven technology.

EDUCATION

Universitas Sam Ratulangi – Information Systems *2021 – 2025*

Thesis: Identifying the Meaning of Baby Cries Using Mel Spectrogram with CNN Algorithm

GPA**:** 3.88 / 4.00

SMA Negeri 1 Tomohon - Social Science *2018-2021*

PROJECT

TouLeos – Shopping Assistant App Innovation in Traditional Markets
June 2023- Sep 2023

- An innovative solution to address the challenges people often face when shopping in traditional markets. Through this shopping assistant app, we aim to make the shopping process easier, especially for seniors who may have physical limitations and difficulty navigating crowded environments.

Kapoya – Information And Public Service Portal For Kapoya Village

June 2025- June 2025

- Public information and service portal built with Node.js to display village profiles, news, galleries, location maps, and statistics

EcoMeter - Blockchain-Based IoT Biogas Distribution System

Oct 2025- Oct 2025

- Developed a decentralized finance (DeFi) application for transparent and sustainable biogas distribution management using blockchain technology and IoT integration. EcoMeter enables real-time monitoring of biogas production, token-based reward systems, and community-driven environmental impact tracking

KarWanua - GHG Emission Calculator for Waste Management

Oct 2025- Oct 2025

- Full-Stack Web Application | Next.js 15 + TypeScript
- A comprehensive web application for calculating greenhouse gas (GHG) emissions from various municipal waste management methods, using validated scientific methodologies (IPCC 2006 Guidelines & IGES Calculator vIII).

WORK EXPERIENCES

Technical Director– PT. Baciraro Kreatif Minahasa

June 2025 – Present

Leading the development and implementation of technology solutions, managing technical teams, defining system standards and architecture, and ensuring digital projects run according to quality targets, timeframes, and user needs.

Admin and Financial Staff – PT. Perintis Perlindungan Instalasi Listrik Nasional

Oct 2025 - March 2026

Manage company administration and financial records, including document archiving, invoice and payment processing, transaction recording, financial report preparation, and ensuring the completeness and accuracy of administrative and financial data to support the smooth operation of the company.

ORGANIZATIONAL EXPERIENCES

Orders – Digital & Environmental Startup Team *Sep 2024 – Aug 2025*

- Part of the core team of Orders, a technology startup that provides services such as website and mobile app development, poster and branding design, and digital solution development tailored to client needs.
- Actively contributes to various environmental technology projects by collaborating with sustainability-oriented startups to develop waste management systems, public education campaigns, and platforms that support environmentally friendly practices.
- Deepening the Internet of Things (IoT) field by integrating sensor-based technology for environmental monitoring and developing innovative intelligent systems.

Department of Tnterests and Talents – BEM FMIPA UNSRAT *Feb 2024 – Feb 2025*

- Assisted in organizing academic and social events for the Faculty of Mathematics and Natural Sciences, fostering student engagement and collaboration.

Department of Interests and Talents – HIMSIFOR UNSRAT *Feb 2024 – 2025*

- Facilitated member development, organized workshops, and talent showcases to support students in exploring their skills and creativity

Multimedia and Communication Services– UPK Kristen UNSRAT *Feb 2024 – 2025*

- Facilitated member development, organized workshops, and talent showcases to support students in exploring their skills and creativity

Monitoring and Evaluation – PPK Ormawa HIMSIFOR UNSRAT *July 2024 – Des 2024 (Desa Kolongan)*

- Examining student organization activity reports to ensure compliance with the work plan, performance evaluation based on program indicators, consultation and coaching related to challenges faced, and preparing recommendations based on monitoring and evaluation results to increase the effectiveness and efficiency of activities.

COMMITTEE EXPERIENCES

- **RevoU Tech Academy: Data & Sof Batch of August 2023**
  Aug 2023- Dec 2023
  Chosen as a participant in the Kampus Merdeka x RevoU intensive program, specializing in full-stack web development and data analytics. Contributed to a Capstone Project by developing a web-based "Urban Vibes Daily" news dashboard tailored for young audiences using HTML, CSS, and JavaScript. Worked within a cross-functional team in a startup-like setting, managing real-time deadlines, weekly sprints, and mentor reviews—enhancing both technical expertise and soft skills, including collaboration, communication, and problem-solving. Creative Designer and Publisher, Information Systems student at UNSRAT, Class of 2021..
- **Orders – Startup Project Team** *2024-2025*
  Core team member of Orders, a digital startup focused on web application development, UI/UX design, and digital solutions. Actively contributing to environmental innovation, Orders operates as an eco-friendly digital movement, developing sustainable technology-based products to promote environmental awareness and action.
- **PPK Ormawa - Program Penguatan Kapasitas ORMAWA** *2024*
  Part of a national student activity unit project dedicated to empowering rural communities through digital innovation and sustainability-driven initiatives.
- **Finalist – BRIN AIDeaNation (Jakarta)** *2025*
  Selected as one of the national finalists with the innovation project Eco Vending Machine (EVM) with Blockchain Integration, a digital solution designed to create a transparent and sustainable waste management system by leveraging blockchain technology for accountability and efficiency

ADDITIONAL

Languages: English (Intermediate), Bahasa Indonesia (Native)

Technical Skills:

- Programming: Python, PHP, JavaScript, Dart, Java-(Expert)
- Database: SQL (MySQL, SQLite) - (Intermediate)
- Web Development: HTML, CSS, React, Laravel, Django, Vue,Node.js - (Experince)
- Mobile Development: Flutter (Intermediate), Android Studio (Java, Kotlin) - (Intermediate)
- Other: Git, API integration, AI model integration - (Intermediate)
